REMOTE + RELOCATION OPEN

01 PROFESSIONAL PROFILE

Bilingual software engineering graduate specialized in data analysis, combining frontend development with practical experience in digital records, customer operations, data quality, and first-line IT support. Builds responsive web applications that organize information, simplify workflows, and make services easier to use. Known for structured problem-solving, confidentiality, clear communication, and the ability to support non-technical users.

02 CAPABILITY MAP

INTERFACES Responsive UI, React, Next.js, component-based development, accessibility, forms, and mobile-first interaction.	INFORMATION Document classification, metadata, naming conventions, search, data validation, reporting, and digital archiving.
OPERATIONS Customer support, workflow analysis, incident follow-up, KYC records, administrative coordination, and deadlines.	DELIVERY Git/GitHub, testing, troubleshooting, documentation, iterative improvement, Vercel, and user guidance.

03 SELECTED SYSTEMS

01	German Exam Preparation Platform CLIENT PROJECT • PRIVATE • 2026 Responsive examination-preparation platform supporting structured German-language practice across reading, listening, writing, and speaking. - Contributed to product flows, responsive interfaces, content organisation, testing, and iterative usability improvements. - Worked with React, JavaScript, Supabase, SQL, multimedia content, authentication, and role-based application workflows. - Repository and sensitive implementation details remain private because the work was completed for a client.
02	NexaCase PORTFOLIO MVP • 2026 A case-management workspace designed to organise clients, cases, documents, tasks, and critical deadlines from one clear interface. - Designed around practical case lifecycle, document, calendar, search, and workload-management needs. - Built as a fictional demonstration product with responsive interfaces and no real client information.
03	Arkiva PORTFOLIO MVP • 2026 A digital document-management and archiving interface for capturing, classifying, finding, securing, and retrieving records. - Explores document intake, metadata, naming rules, OCR-ready workflows, permissions, audit history, and download controls. - Separates information-governance needs from the case-management focus of NexaCase.

04 PROFESSIONAL EXPERIENCE

Census Enumerator | RGPB/RGAE — National Operations

Bafoussam & West Region | May 2026 – Jun 2026

- Collected structured household data digitally, verified completeness and consistency, reported anomalies, and protected confidential information.
- Managed a demanding field workload independently, completing up to 17 household interviews in one day while maintaining quality and deadlines.

04 PROFESSIONAL EXPERIENCE — CONTINUED

Customer Service & Transfer Operations Agent | One Transfer / TransferGratis

Yaoundé & remote | Aug 2022 – Feb 2024

- Managed digital client records covering account setup, KYC checks, transfers, supporting documents, incidents, and escalations.
- Corrected data-entry issues, maintained traceability in CRM/ticketing workflows, protected sensitive information, and followed pending cases to resolution.
- Provided bilingual assistance, explained procedures clearly, and coordinated with internal teams on transaction and user-support issues.

Administrative Secretary | Private Organisation

Yaoundé | Oct 2021 – Jul 2022

- Created, classified, updated, and retrieved records, correspondence, registers, and tracking sheets using Microsoft Office.
- Controlled information accuracy, organised current archives, scheduled activities, and shared documents only with authorised recipients.

Primary School Teacher | GBPS Bamenjou

Bamenjou | Sep 2019 – Jun 2021

- Planned lessons, managed groups, created learning materials, maintained records, and communicated complex information in accessible language.
- Strengthened facilitation, user-training, organisation, writing, and calm performance under pressure.

05 EDUCATION & CREDENTIALS

Bachelor’s Degree in Software Engineering — Data Analysis

ICT University

Degree completed in 2026.

Professional Certificate in Data Analysis

VisionConception Academy

One-year applied programme covering data preparation, analysis, and reporting.

Microsoft Office Specialist — Level 3

Professional certification

Microsoft Word, Excel, PowerPoint, and productivity tools.

GCE Advanced Level — Science

GBHS Emana

Chemistry, ICT, and Biology.

06 TECHNICAL TOOLKIT

FRONTEND & DELIVERY

HTML, CSS, JavaScript, React, Next.js, TypeScript, Tailwind CSS, Supabase, Git, GitHub, Vercel

DATA & REPORTING

Python, SQL, Excel, Power Query, Power BI, Jupyter Notebook, SPSS, Tableau, MySQL, Microsoft Access

IT & PRODUCTIVITY

Windows, Microsoft 365, user accounts, printers/scanners, application configuration, network fundamentals, first-line troubleshooting

DIGITAL RECORDS

GED principles, scanning/OCR workflows, PDF/PDF-A awareness, metadata, versioning, access permissions, backups, confidentiality

07 LANGUAGES & WORKING STYLE

English — fluent/professional | French — fluent/professional | Japanese — elementary notions

Working style: structured, discreet, service-oriented, analytical, adaptable, and committed to clear documentation. Open to remote opportunities and relocation.

08 WORKING PRINCIPLES & ROLE FOCUS

UNDERSTAND

Clarify the real workflow and user need before designing the screen or automating the process.

SIMPLIFY

Prefer clear information architecture and maintainable components over unnecessary complexity.

PROTECT

Treat confidential data, permissions, traceability, and secure handling as product requirements.

DELIVER

Test across devices, document decisions, resolve defects methodically, and improve from feedback.

Target roles: Junior Frontend Developer, Digitalisation/GED Assistant, IT Support or Operations, Data Operations/Quality, and Customer Technology Support. References available on request.
